

Brian J. Skinner

CONTACT INFORMATION	Massachusetts Institute of Technology 77 Massachusetts Ave Bldg. 4-345c Cambridge, MA 02139 USA	<i>Phone:</i> +1-617-253-3896 <i>E-mail:</i> skinner1@mit.edu
EMPLOYMENT HISTORY	Massachusetts Institute of Technology , Cambridge, MA USA <i>Postdoctoral Associate</i> Supervisors: Liang Fu, Leonid Levitov Argonne National Laboratory Materials Science Division, Argonne, IL USA <i>Eugene Wigner Postdoctoral Fellow</i> Supervisor: K. A. Matveev University of Minnesota Physics Department, Minneapolis, MN USA <i>Research Associate</i> Advisors: B. I. Shklovskii and Alexander L. Efros	August 2015 – present August 2013 – August 2015 September 2011 – August 2013
EDUCATION	University of Minnesota , Minneapolis, MN USA Ph.D., <i>Physics</i> , August 2011 Dissertation: <i>Microscopic Theory of Supercapacitors</i> Advisor: Boris I. Shklovskii Virginia Polytechnic Institute and State University , Blacksburg, VA USA B.S., <i>Physics</i> and B.S., <i>Mechanical Engineering</i> , May 2007 <i>Summa cum Laude</i> , Honors Baccalaureate diploma Minors in Mathematics and Spanish	
SELECTED AWARDS	Eugene Wigner Postdoctoral Fellowship , 2013 University of Minnesota Physics Department: <ul style="list-style-type: none">• Anatoly Larkin Fellowship, 2008• Outstanding TA Award, 2008 National Science Foundation Graduate Research Fellowship , 2007 (used 2008 – 2011) Rhodes Scholarship finalist, 2007 Phi Kappa Phi Yoerger Presidential Fellowship , 2007 Barry M. Goldwater Research Scholarship , 2006 Virginia Polytechnic Institute and State University: <ul style="list-style-type: none">• Physics Department Scholarships (5), 2003–2007• College of Science Scholarships (4), 2003–2006• College of Engineering Scholarships (7), 2002–2006 National Merit Scholarship , 2002 NCTE Achievement Awards in Writing , 2001	
SUMMARY OF RESEARCH INTERESTS	I am a theorist focusing mostly on many-electron systems with long-ranged interactions and/or strong disorder.	

50. Brian Skinner, Jonathan Ruhman, and Adam Nahum, *Measurement-Induced Phase Transitions in the Dynamics of Entanglement*, arxiv:1808.05953 (2018).
49. Sihang Liang, Satya Kushwaha, Tong Gao, Max Hirschberger, Jian Li, Zhijun Wang, Karoline Stolze, Brian Skinner, B. A. Bernevig, R. J. Cava, and N. P. Ong, *A gap-protected zero-Hall effect state in the quantum limit of the nonsymmorphic metal KHgSb*, under review at Nature Materials (2018).
48. J. Crossno, K. C. Fong, Brian Skinner, L. Levitov, and P. Kim, *Magneto-thermal transport in graphene via Johnson Noise*, in preparation (2018).
47. D. Nandi*, Brian Skinner*, G.H. Lee, K.-F. Huang, K. Shain, Cui-Zu Chang, Y. Ou, S.-P. Lee, J. Ward, J.S. Moodera, P. Kim, B.I. Halperin, A. Yacoby, *Signatures of long-range-correlated disorder in the magnetotransport of ultrathin topological insulators*, submitted to Physical Review B (2018).
46. S. V. Syzranov, Ya. I. Rodionov, and B. Skinner, *Adiabatic dechiralization and thermodynamics of Weyl semimetals*, Phys. Rev. B **98**, 081114(R) (2018).
45. Tristan Shi, Brian Skinner, Brandt C. Pein, Yaqing Zhang, Pin-Chun Shen, Edbert J. Sie, Jake Siegel, Yi-Hsien Lee, Jing Kong, and Keith A. Nelson, *Terahertz Electro-optic Modulator with Monolayer MoS₂*, submitted to Nature Materials (2018).
44. D. K. Efetov, R.-J. Schiue, Y. Gao, B. Skinner, E. Walsh, C. Choi, J. Zheng, C. Tan, G. Grosso, C. Peng, J. Hone, K. C. Fong, and D. Englund, *Fast thermal relaxation in cavity-coupled graphene bolometers with a Johnson noise read-out*, Nature Nanotechnology (2018).
43. Debanjan Chowdhury*, Brian Skinner*, and Patrick A. Lee, *Semiclassical theory of the tunneling anomaly in partially spin-polarized compressible quantum Hall states*, Phys. Rev. B **97**, 195114 (2018).
42. Debanjan Chowdhury*, Brian Skinner*, and Patrick A. Lee, *Effect of magnetization on the tunneling anomaly in compressible quantum Hall states*, Phys. Rev. Lett. **120**, 266601 (2018).
41. Brian Skinner and Liang Fu, *Large, nonsaturating thermopower in a quantizing magnetic field*, Science Advances **4**, eaat2621 (2018).

BOOK
CHAPTERS

Brian Skinner and Matthew Goldman, "Optimal Strategy in Basketball". In *Handbook of Statistical Methods and Analyses in Sports*, part of the series of Handbooks of Modern Statistical Methods, CRC Press, 2017.

SELECTED
INVITED
PRESENTATIONS

Large, nonsaturating thermopower in nodal semimetals in a quantizing magnetic field, Conference: Relativistic Fermions and Nodal Semimetals from Topology, Banff International Research Station, February 2018.

Semimetals Unlimited: Unbounded electrical and thermal transport properties in three-dimensional nodal semimetals,
University of California Santa Cruz, condensed matter physics seminar, May 2018;
Oxford University, condensed matter physics seminar, April 2018;

Cambridge University, condensed matter physics seminar, April 2018;
ESPCI Paris, condensed matter physics seminar, April 2018;
University of Paris-Sud, condensed matter physics seminar, April 2018;
University of Pennsylvania, Materials Science Department special seminar, February 2018;
Johns Hopkins University, condensed matter physics seminar, February 2018;
Florida State University, condensed matter physics seminar, January 2018;
Penn State University, condensed matter physics seminar, January 2018;
University of Florida, condensed matter physics seminar, January 2018;
[Caltech Condensed Matter Physics seminar](#), November 2017

Three surprising short stories about electron puddles, Kavli Institute for Theoretical Physics seminar, April 2017.

Is there a theory of optimal strategy in basketball?, Harvard Sports Analytics Cooperative meeting, February 2017.

Field-tunable Bosonic Phases of Interlayer Excitons, [Boston Area CarBON Nanoscience Meetings \(BACON+\)](#), Harvard, February 2016.

Nonlinear screening of charged impurities in topological materials, [MIT Condensed Matter Theory Seminar](#), September 2015.

A toy model of reaction-diffusion processes with topological degrees of freedom, Caltech IQIM seminar, July 2015

Disorder-assisted transport in topological insulators and nanocrystal superlattices, MIT, [Center for Excitonics Seminar](#), May 2015.

Problems in Human Motion Planning,

New York University, [Applied Math Lab Seminar](#), April 2016;
Harvard University, [Widely Applied Mathematics Seminar](#), February 2016;
Notre Dame University, [Condensed Matter/Biophysics Seminar](#), April 2015;
University of Virginia, [Condensed Matter Seminar](#), February 2015;
Simons Foundation, January 2015;
University of Minnesota, [Condensed Matter Seminar](#), October 2014;
University of Chicago, [Computations in Science Seminar](#), July 2014.

Negative compressibility and supercapacitors,

University of Illinois, Chicago, [Condensed Matter/Biophysics Seminar](#), April 2015;
Emory University, Physics Department Colloquium, January 2015;
University of California, San Diego, Condensed Matter Seminar, January 2015;
Washington University in St. Louis, [Condensed Matter seminar](#), September 2014;
University of Texas at Austin, [Condensed Matter Seminar](#), April 2014;
Massachusetts Institute of Technology, [Chez Pierre seminar](#), October 2013;
Harvard University, special condensed matter seminar, October 2013.

The physics of supercapacitors,

UCLA, [Physics and Astronomy Colloquium](#), May 2014;
University of Washington, [Physics Department Colloquium](#), February 2014;
University of Minnesota, Electrical and Computer Engineering Department Colloquium Series, April 2012.

Hopping transport and the "Coulomb gap triptych" in nanocrystal arrays, [Conference: Transport in Interacting Disordered Systems](#), Barcelona, September 2013.

Theory of hopping transport in arrays of doped semiconductor nanocrystals, [Workshop: Electron Transport in Nanocrystal Assemblies](#), University of Minnesota, June 2013.

Large capacitance enhancement in graphene driven by electron correlations, [Workshop: Electron Interactions in Graphene and Other New 2D Materials](#), University of Minnesota, May 2013.

Hopping transport in quantum dot arrays, Physics Department Colloquium Series, University at Buffalo, State University of New York, March 2013.

The Price of Anarchy in Basketball, [MIT Sloan Sports Analytics Conference](#) (research paper contest winners), Boston, MA, March 2010.

Implementing a Quantum Random Walk on a Four-Qubit Quantum Information Processor, Virginia Tech, Condensed Matter Seminar, September 2005.

REFEREE
SERVICE

Physical Review Letters, Physical Review B, Physical Review E, Physical Review Applied, Nature Communications, Scientific Reports, npj 2D Materials and Applications, IEEE Transactions on Electronic Devices, Physica B, PLOS Computational Biology, Journal of Quantitative Analysis in Sports

Reviewer for DOE grant proposals

PREVIOUS
RESEARCH
EXPERIENCE

Virginia Tech Physics Department, Blacksburg, VA USA

Undergraduate research assistant January 2003 – May 2007

- Theoretical condensed matter: non-equilibrium driven systems
- Advisors: B. Schmittmann and R. K. P. Zia.

Undergraduate research assistant May 2004 – December 2006

- Neutrino physics: UCN-A (Los Alamos) and Borexino (Gran Sasso) experiments
- Advisor: R. Bruce Vogelaar

CERN, Geneva, Switzerland

Summer student/REU undergraduate research assistant June – August 2006

- Calibration of the CMS hadronic calorimeter
- Advisor: Nural Akchurin, [Texas Tech University](#)

MIT Department of Nuclear Engineering, Cambridge, MA

REU undergraduate research assistant June – August 2005

- NMR quantum computing
- Advisor: David G. Cory

United States Naval Research Laboratory, Washington, DC

Physical science aid June – August 2001, 2002

- Acoustic scattering
- Advisor: Charles F. Gaumond

TEACHING
EXPERIENCE
AND OUTREACH

Author of a popular physics blog, [Gravity and Levity](#), that explains upper-level concepts in physics and has been viewed over 900,000 times. March 2009 – present

Speaker at the USA Science and Engineering Festival in Washington DC. Talk entitled “Nanoscience and the ‘Choose Your Own Adventure’ Era of Quantum Physics”. April 2016

Teacher at MIT’s annual “[MIT Splash](#)” event for high school students. Courses designed and taught: November 2015, 2016, 2017

- “Quantum Mechanics with 9th Grade Math”
- “Quantum Field Theory Story Time”
- “The Math of Basketball Strategy”

Judge at high school and middle school science fairs in the Chicago area. January - March 2014

Judge at the Minnesota State Science Fair, high school and middle school level, sponsored by the Minnesota Academy of Science. April 2013

University of Minnesota, Minneapolis, MN USA

Teaching Assistant September 2007 – May 2008

- PHYS 1301: Introductory Physics for Science and Engineering I (2 sections)
- PHYS 1202: Introductory Physics for Biology and Pre-medicine II (2 sections)

Private tutoring September 2007 – December 2008

- PHYS 1202: Introductory Physics for Biology and Pre-medicine II
- PHYS 1301: Introductory Physics for Science and Engineering I
- PHYS 1302: Introductory Physics for Science and Engineering II
- PHYS 2201: Introductory Thermodynamics and Statistical Physics
